

Meet our School Leaders

Priya Nazare

Headmistress, Sardar Kanhoji Angre English Medium School

I attended the ISLI showcase which was very impactful for me because it resonated the challenges that I was facing as a school leader. That is when I decided to join the ISLI fellowship.

The fellowship has had many positive outcomes in my school. I now feel extremely confident in communicating with my staff- both teaching and non-teaching staff.

The domains- Leading learning, leading for equity, leading people have been very helpful and provided the right guidelines to work better. Because of all this, my school has a healthy culture where teachers are working together and participating in solving the challenges we face. This obviously has impacted our students positively.

India School Leadership Institute (ISLI) has made me a very confident person. The learnings over the past few months have already resulted in building a positive school environment. But most importantly, it has been a complete transformational process for me.
